* http://www.emcef.com/emcef100.html

Programme

Morning clinic – medical

0900 Blood gas interpretation **2hrs**

A **new**, step-by-step, rule-out system for analysing blood gas data, without any guesswork

1100 Break

1130 ECG rhythm analysis **1hr**

Reinforcing rhythm analysis, a **new** system for identifying blocks and some abnormalities that one should not miss

1230 Lunch

Afternoon clinic – trauma

1330 GCS measurement **0.5hrs**

Practical tricks and an in-depth understanding – never get it wrong again!

1400 CXR in trauma **1.5hrs**

The ideal method for the Primary Survey, with tricks and tips. Read it like an expert

1530 Break

1600 C-spine X-rays **1hr**

A systematic analysis for daily use, including subtleties

About STAMPEM

- Workshops on systems for everyday analysis of patient data – blood gases, ECGs & X-rays
- Principles, safety tips, tricks & shortcuts
- Practical methods that anyone can use on every shift. All explained down to basics
- Teaching by EM consultants, each with at least 10 years' actual shop-floor experience

Endorsements

Why did no-one ever teach me this before? I could have been do much more right all these years! [ST4, Acute Medicine, on Blood Gas session]

ABCs for ABGs – what a great system… [Consultant, Emergency Medicine, on Blood Gas session]

This is the best ever method… [FY1, on Blood Gas session]

Very useful session. I used it the very next day and it worked perfectly… [FY2, on Blood Gas session]

Thanks for this – at last something I can work with! [ST2, Emergency Medicine, on ECG Rhythm session]

I will recommend this to my colleagues (and my seniors)… [FY2]

A great combination of topics – are there any others? The systems are really great! [Medical student]

This stuff should be taught at medical school the way your course teaches it… [FY2, Emergency Medicine]

The blood gas lecture is the best lecture I have ever been to… [ST2, Acute Medicine]

A "must read" – thanks for doing this. Perfect for all levels… [ST3, Paediatric Emergency Medicine]

The X-ray sessions were the most useful. It's important to have a system, so that you don't miss anything in the heat of the moment! [ST1, Trauma]

Thank you for all the practical real-life tips and tricks. I will use these every day! [FY2]

Best day of education in years. I am sold on all the systems! [ST5, Emergency Medicine]

Really good radiology methods, especially the CXR Primary Survey… [FY2]

Simply amazing! [FY1]

Great sessions on X-rays, especially the chest primary survey… [FY2]

Very useful! Nice to have something that all team-members can use… [Charge Nurse, ITU]

Have been working for years on trauma patients. Never seen it done this well and thoroughly explained and clarified… [Associate Specialist, Emergency Medicine]

Really great lectures and workshops. Useful for every day practice… [ACP, Emergency Medicine]

Great fun. Expert delivery… [FY2]
