

Surgical Skills for Non Surgeons

Surgical Skills for Aspiring & Junior Plastic Surgeons– 1 day course

A new course to teach those surgical skills required by Plastic Surgery trainees to manage wounds in ED and Minor Operations lists and provide a sound base for future development.

Developed by experienced ED & Plastic Consultants who also teach on the RCS Surgery Skills Courses.

Would suit other speciality trainees eg Maxillo-Facial, ENT, Orthopaedic & General Surgery for an insight into basic plastic surgical techniques.

Course includes:

- Expectations of a Junior Plastic Surgeon
- Correct use of Instruments
- Knot tying
- Wound Exploration & Visualisation
- Corner, mattress, simple & continuous sutures
- Advanced suturing – lips, gums, ears & tongue
- Tendon repair & lesion excision
- Flaps & grafts
- Q&As/Audit/Finish

Feedback:

“very helpful instructor, makes you feel comfortable. Definitely recommend it. ...recently done the BSS course but I believe it is worth doing both courses as this one is more related to plastics”. FY3

“good information about flaps and understanding the concepts behind them”. CIF Surg

“great level of detail in explaining the skills, especially the in-real-life tips. Very useful skills, thank you”. SHO/FY3 locums

“really great course. Brilliant for juniors learning plastics”. Trust Grade CT Plas
