## Systems & Tips for Analytical Medical Practice (Emergency Medicine)

20 April, 2022  
09:00-17:00

Lecture Theatre 2, Education Centre, Queen Elizabeth Hospital,  
Mindelsohn Way, Edgbaston, Birmingham, B15 2GW

Wheel-  
chair  
access

Approved by **EMCEF100** \* for one CPD credit for each hour attended,  
once feedback is returned (max 6 hours)

\* <http://www.emcef.com/emcef100.html>

# About STAMP<sub>EM</sub>

- Workshops on systems for everyday analysis of patient data – blood gases, ECGs & X-rays
- Principles, safety tips, tricks & shortcuts
- Practical methods that anyone can use on every shift. All explained down to basics
- Teaching by EM consultants, each with at least 10 years' actual shop-floor experience

## **Get it!**

Interactive, workshop-style learning, to ensure you understand every step

## **Get it right!**

You will be able to absorb and perform every method shown to the 100% level

## **Get it right away!**

Tools you can use as of when you finish the course – prove it to yourself on the day with multiple examples to work through

# Programme

## Morning clinic – medical

**0900** Blood gas interpretation **2hrs**

A **new**, step-by-step, rule-out system for analysing blood gas data, without any guesswork

**1100** **B r e a k**

**1130** ECG analysis **1hr**

Reinforcing rhythm analysis, a **new** system for identifying blocks and some abnormalities that one should not miss

**1230** **L u n c h**

## Afternoon clinic – trauma

**1330** GCS measurement **0.5hrs**

Practical tricks and an in-depth understanding – never get it wrong again!

**1400** CXR, trauma & medical **1.5hrs**

The ideal method for the Primary Survey, with tricks and tips. Read it like an expert

**1530** **B r e a k**

**1600** Which test do I need? **1hr**

Which tests to do and when, Blood gas, imaging, etc...

# Endorsements

*Why did no-one ever teach me this before? I could have been so much more right all these years! [ST4, Acute Medicine, on Blood Gas session]*

*ABCs for ABGs – what a great system... [Consultant, Emergency Medicine]*

*This is the best ever method... [FY1, on Blood Gas session]*

*Very useful session. I used it the very next day and it worked perfectly... [FY2, on Blood Gas session]*

*Thanks for this – at last something I can work with! [ST2, Emergency Medicine, on ECG Rhythm session]*

*I will recommend this to my colleagues (and my seniors)... [FY2]*

*A great combination of topics – are there any others?*

*The systems are really great! [Medical student]*

*This stuff should be taught at medical school the way your course teaches it... [FY2, Emergency Medicine]*

*The blood gas lecture is the best lecture I have ever been to... [ST2, Acute Medicine]*

*A “must read” – thanks for doing this. Perfect for all levels... [ST3, Paediatric Emergency Medicine]*

*Completely changed the way I look at ABGs... [GP WSI A&E]*

*The X-ray sessions were the most useful. It's important to have a system, so that you don't miss anything in the heat of the moment! [ST1, Trauma]*

*Thank you for all the practical real-life tips and tricks. I will use these every day! [FY2]*

*Best day of education in years. I am sold on all the systems! [ST5, Emergency Medicine]*

*Really good radiology methods, especially the CXR Primary Survey... [FY2]*

*Simply amazing! [FY1]*

*Great sessions on X-rays, especially the chest primary survey... [FY2]*

*Very useful! Nice to have something that all team-members can use... [Charge Nurse, ITU]*

*Have been working for years on trauma patients. Never seen it done this well and thoroughly explained and clarified... [Associate Specialist, Emergency Medicine]*

*Really great lectures and workshops. Useful for every day practice... [ACP, Emergency Medicine]*

*Great fun. Expert delivery... [FY2]*
