

# Surgical Skills for Non Surgeons

## Suturing & Wound Management in Emergency Medicine– 1 day course

You will go home able to manage most ED wounds

Basic to Advanced Skills using animal tissue (not foam)

Close supervision – to ensure you get it right!

Experienced tutors – directed by a consultant with Surgical & EM experience over 40 years and who also instructs on the RCS Surgical Skills courses

### Course includes:

Principles of Wound Management

Correct use of Instruments

Knot tying

Wound Exploration & Visualisation

Tips for good suturing, incl facial wounds

No Touch suturing technique

OSCE style practice/summary

### Feedback:

“Should be part of mandatory training. Wish I had done this as a CT1/F2” EM ST6

“I wish I had been taught this before. 100% recommended to all doctors in A&E”. EM SpDr

“this teaching has greatly improved my knowledge about wound management. I feel more confident applying this knowledge”. EM Jun Dr (received 48 hrs after course – “yesterday I did close up a lip wound meant for maxillo-facial, with lots of confidence” EM Jun Dr)

“Thoroughly enjoyed – expert delivered tuition” EM Consultant

“thanks for slide printouts. Videos really useful & appropriately used. Great to practice with pigs tissue – very helpful. Thank you Joe and Don”. FM ST5
